How can I make this grow better???

What about my garden plants, houseplants, lawn, shrubs and trees?

Calcium-25[®] can improve the growth for all your plants, including houseplants, your garden flowers and vegetables, or make your nursery stock more valuable in a small amount of time! Calcium-25 improves root growth for healthy lawns, increases nutrient uptake, and makes your apple and fruit trees thrive!! Also, shrubs, berries...you name it! Calcium-25 works! You can actually double your vegetable yields - and, it's affordable!!!! Read on!

And my nursery stock???

Your nursery stock increases in value with time. Larger plants sell for more. You can make those plants grow larger and healthier in far less time with Calcium-25!!!!!!!

... So, what is Calcium-25?

Calcium-25 is a gardener's or nursery growers dream! Not only does it promote rapid plant growth with all flowers and houseplants, but it also increases your vegetable yields, increases the yields of apple and fruit trees and helps storage life, improves lawns and landscaping, and increases the value of your nursery stock in a short time! And, for most plants, with only one foliar spray! Just dissolve **Calcium-25** in water and spray your plants, trees, lawn, shrubs, or any plant and see the results!!! And **Calcium-25** is much more than a calcium nutrient. It contains valuable calcium and your plants' own natural leaf waxes so it can be absorbed efficiently

Calcium-25 was developed for the agricultural market in 1981 by Dr. Andrew J. Welebir, president and research director of Bio-Gard Agronomics, Inc., as the first organic calcium source which also acts as a non-toxic plant growth enhancer. Due to its unique formulation, the product not only supplies necessary life-supporting calcium, but is absorbed differently than any other calcium product on the market.

Calcium-25, when applied as directed, causes a rapid increase in growth. This increase also causes an efficient increase in nutrient absorption from the soil. The plant growth-stimulating effect carries over to higher quality gardens, vegetable yields, larger nursery stock -- better lawns and gardens and much healthier houseplants!!

Just mix **Calcium-25** in water, and, for pennies a plant, do what no other nursery product can do!! Many plants can be sprayed every 2 to 4 weeks. And don't confuse **Calcium-25** with any other calcium product!! Also, using your soil fertilizer a day after **Calcium-25** makes them both work better!! **Calcium-25... it natural, safe, and it's affordable!!**

**Calcium-25 is
100% organic!!!**

These are just some of the increases and benefits you can expect using **Calcium-25**

Apples & Fruit Trees	18-28%
Azaleas	larger flowers, fast growth

Lettuce, Cabbage	up to 33%
Melons, Cucumbers	40-130%
Peas	50% or more
Peppers	30% or more
Roses	LARGE blooms!
Sweet Corn	up to 56%
Tomatoes	30 to 58%

Landscaping & Shrubs - greener & thicker - 20 to 50% more growth!!

Also - GOLF COURSES!!

To use **Calcium-25** on your garden, houseplants, landscaping, and nursery plants, follow these simple guidelines:

1. Always dilute **Calcium-25** to the right concentration with water only. For small applications, use it at the rate of one level teaspoon for each gallon of water.
2. Spray your plants at a room temperature or higher. This affects how fast **Calcium-25** is absorbed.
3. Keep leaves wet for at least 10 minutes with the **Calcium-25** spray.
4. For even better results, use your normal soil fertilizer the next day - this way, they both work better! Including other organic foliar sprays!

How Do I Use Calcium-25??

Best stages for application of Calcium-25 on various vegetables, ornamentals, and other plants

Crop	Stage for Application
Apples	spring when fruit is about the size of a dime or nickel
Azaleas	early spring before buds
Beans (all types)	2nd to 4th trifoliolate (about 6")
Beets, Broccoli, Carrots	
Cauliflower; Celery	4 to 8 pairs of leaves
Blueberries, etc.	starting early spring*
Carnations	Before budding
Chrysanthemums	Before and during budding, starting early fall, every month or two during the season
Cucumbers	3 to 5 leaves, before budding
Daffodils, Crocuses	2-3 weeks after first the leaves appear
Flowers in general	early when buds are starting to form, mid-season, also, when plants bloom all summer.
Grapes	before or at bloom (more growth), mid-season (larger grapes), late season (storage)
Houseplants	anytime, year round*
Hyacinths	before budding
Lawns	early spring after dormancy, also, midsummer; late fall
Lettuce, Cabbage	4 to 8 pairs of leaves
Melons, Cantaloupes	3 to 5 leaves, before budding
Onions	2 to 4 wks. after transplanting
Peaches, Pears, Fruits	same as apples
Peas	4 to 10 inches in height
Peppers	Approx. 6 inches in height*
Potatoes	4 to 8 inches, before buds
Radishes	4 to 8 pairs of leaves
Roses	before/during budding, can spray every month or two
Rhododendrons	Before or during budding
Shrubs	every other month in season
Spinach	4 to 8 pairs of leaves, up to 2 weeks before harvest*
Squash	3 to 5 leaves, before budding
Sweet Corn	3 to 6 leaves
Tomatoes	2 weeks after transplanting*
Tulips	2-weeks after emergence
Watermelons	Before budding
Other Vegetables	4 to 8 pairs of leaves
Ornamentals	Anytime. For best results, use soil fertilizer 1 day after*

*Can be treated every 2 to 4 weeks

What else can I do with Calcium-25?

Calcium-25 is not only useful on all your houseplants, garden vegetables, and nursery stock, but also dramatically improves lawns, shrubs, and other plants.
